Deterministic Architecture

FTID discards generic "AI scores" for verifiable, deterministic financial mathematics. Powered by a global event bus, actions taken by a citizen instantly affect a bank's risk model and a regulator's Early Warning System.

- ✓ Global Event Engine for real-time state propagation
- ✓ Deterministic Financial Health & Trust Scoring
- ✓ Domain-validated taxonomy (NPA, EWS, Stress Tests)
- ✓ Zero-trust cross-entity data architecture

WEALTH INTELLIGENCE

KEY FINDING

You hold ₹8.0L in liquid cash, exceeding the 6-month emergency fund rule by ₹5L. This cash is losing purchasing power due to 5.2% inflation.

RECOMMENDED ACTION

Rebalance ₹5L excess cash into Sovereign Gold Bonds (SGBs) for inflation-hedged growth.

PRIMARY OBJECTIVE

Is a systemic risk event emerging in the cooperative banking sector?

 RECOMMENDATION

Three regional cooperative banks are showing rapid deposit depletion (14% drop in 48 hours). Simultaneous spike in unsecured loan defaults.

 EXPECTED IMPACT

Deploying a temporary liquidity backstop will prevent local retail panic and stabilize the regional banking cluster.
