

SOVEREIGN FINANCIAL INFRASTRUCTURE

A Unified Operating System for Financial Intelligence

FTID is a deterministic network connecting Citizens, Businesses, Banks, and Regulators. It transforms fragmented national data into real-time observability, dynamic credit underwriting, and systemic stability.

Launch Regulator Demo →

Why Existing Systems Fail

Currently, national financial data is trapped in isolated silos. Tax authorities, banks, regulators, and citizens operate on asynchronous ledgers with massive reconciliation delays, creating systemic blind spots.

- 

Fragmented Ledgers
GST, Income Tax, and UPI operate independently, making holistic credit underwriting for MSMEs mathematically impossible without high friction.
- 

Reactive Regulation
Systemic risk and fraud are only detected post-facto. Regulators lack real-time network observability to preempt cascading financial failure.

The FTID Intelligence Flow

FTID acts as a deterministic state machine. An event at the Citizen or Business level instantly propagates through the entire financial graph, updating risk profiles and systemic metrics in $O(1)$ time.

Why FTID Matters for India

As the fastest-growing digital economy, India requires an operating system that scales securely. FTID is designed to be the foundational intelligence layer above India Stack (Aadhaar, UPI, Account Aggregator).

- 

Financial Inclusion
By converting cash flow into verifiable deterministic trust scores, FTID brings millions of MSMEs into the formal credit grid.
- 

Sovereign Security
Provides regulators and law enforcement with cryptographically verifiable audit trails that cannot be tampered with.

Witness the System Live

Step into the shoes of a Regulator. Experience the 5-minute National Scenario simulation showcasing real-time intelligence propagation.

INTERVENTION STRATEGY

KEY FINDING

Manufacturing output has contracted by 1.8% over the past 30 days based on live GST generation and e-Way bill velocity.

RECOMMENDED ACTION

Trigger Production Linked Incentive (PLI) tranche of ₹15,000 Cr directly to Top 500 manufacturing MSMEs to stimulate immediate inventory production.

INJECT PLI STIMULUS →

Critical

🏠 RBI CENTRAL FRAUD REGISTRY: MULE TOPOLOGY

Source Node: Jamtara-Syndicate-A

Status: Frozen (PNB) • FIR Lodged

Transfer: ₹4.5L (T-2 Days)

To: Acc 4491-*** (ICICI) • Status: Frozen

Transfer: ₹2.1L (T-1 Hr)

LIVE THREAT

To: Acc 8892-*** (Your Bank)

🕒 RISK INTERVENTION

KEY FINDING

Customer account 8892-*** received ₹2.1L one hour ago from a PNB account that was just flagged by the Central Fraud Registry as a primary node in the Jamtara syndicate.

RECOMMENDED ACTION

Proactively freeze account 8892-*** (Debit block) before the funds are withdrawn via ATMs or further cascaded.

FREEZE ACCOUNT (DEBIT BLOCK) ❄️

Alternative Credit Portfolio Risk

Decision: "Should we tighten lending criteria for the SME sector?"

TOTAL COUNTERPARTY EXPOSURE

₹14,250 Cr

 COUNTERPARTY RISK PROFILE: YES BANK (TIER-1)

 **Portfolio Stress**

Elevated

Retail supply chain stress (30 Days)

 **NPA Forecast**

6.8%

Expected SME default rate for Q4

 **EXPOSURE ADJUSTMENT**

KEY FINDING

YES Bank is exhibiting a severe divergence: shedding retail deposits while dramatically increasing reliance on overnight wholesale funding. This creates extreme liquidity vulnerability.

RECOMMENDED ACTION

Adjust risk distribution: Tighten SME lending criteria in Tier-2 regions and increase collateral requirements by 15% to offset forecasted NPA spike.

14 Days

AVG. DSO

 CREDIT DECISION

KEY FINDING

Apex Manufacturing's CIBIL score hasn't updated to reflect their recent government contract wins. However, live GST and e-Way bill data show a massive 14.2% surge in verified physical sales this month.

RECOMMENDED ACTION

Approve a ₹50 Lakh working capital line expansion to capture this low-risk credit opportunity before competitors do.
